EDUCATION

Doctor of Philosophy Mechanical Engineering and Materials Science <u>Duke University, Durham, NC</u> <i>With: Patrick J. Codd, M.D. & Boyuan Chen, Ph.D.</i>	2022–2026
Master of Science Mechanical Engineering and Materials Science <u>Duke University, Durham, NC</u> <i>With: Xiaoyue Ni, Ph.D.</i>	2020–2021
Bachelor of Technology Mechanical Engineering <u>National Institute of Technology, Warangal, India</u> <i>With: P. Bangaru Babu, Ph.D.</i>	2015–2019

SPECIALIZATION AND EXPERIENCE

Sensing for Informed Action

Doctoral candidate specializing in **biomedical sensing** and **closed-loop autonomy** for medical and surgical robotic systems in complex, dynamic environments. I build **full-stack medical robotic systems** that connect **sensing**, **inference**, and **control** across acoustics, imaging, optomechanical systems, embedded platforms, and learning-based models to enable reliable autonomy in high-stakes, unstructured settings of healthcare. My vision is to transform rich sensory data into **actionable intelligence** making precision robotic operation safer and effective.

AWARDS

Rhodes Graduate Fellowship for Interdisciplinary Research, Duke University	2025
IEEE-EMBS Body Sensor Network Travel Award	2025
Duke India Initiative Travel Award, Duke University	2023
Dean's Research Award for Master's Students	2021
Woo Center for Big Data and Precision Health Fellowship	2021
Design Health Fellow, Duke University	2021
Laboratory and Curriculum Development Fellowship, Duke University	2020
S.N. Bose Undergraduate Research Fellowship, Dept. Of Science and Technology, Government of India	2017
Merit Award in Physics and Information Technology, High School Diploma, Government of India	2015

SPONSORED RESEARCH & GRANTS

October 2025 – present

National Science Foundation (\$1.2M) [Under Review]

Role: Project Scoping & Strategy; Led Writing of Research Section; Supported Proposal Assembly

PI: Hao Su, New York University; **Co-PI:** Patrick Codd, Duke University

(RoboLaser) Robotic Laser Cyber-Physical System for Precision Tumor Surgery via Learning in Simulation

Project will develop a robotic laser cyber-physical system that integrates actuation, sensing, physics-based modeling, and decision-making to achieve margin-aware soft-tissue resections. A paired digital twin will enable efficient control-policy learning and will support teleoperation studies.

October 2025 – present

National Science Foundation (\$1.2M) [Under Review]

Role: Project Scoping & Strategy; Assisted in Writing

PI: Leila Bridgeman, Duke University; **Co-PI:** Patrick Codd, Duke University; **Co-PI:** Ryan McNabb, Duke University

Integrated Hardware, Sensing, and Planning for Autonomous Robotic Laser Surgery in Soft Tissue

Project will develop an integrated sensing and surgical-planning framework for autonomous robotic laser resection in soft tissue, combining OCT, thermal imaging, and tumor diagnostic sensing. Optimal, constrained control techniques will enable precise, efficient, and safe volumetric laser resections.

May 2025 – present

Stryker Corporation (\$346K)

Role: Project Scoping & Strategy; Led Proposal Writing & Assembly; IP Coordination

PI: Patrick Codd, Duke University

Optimal Surgical Usage of Ultrasonic Aspirator for Soft-tissue Resection

Project will identify optimal operating parameters for an ultrasonic aspirator to minimize collateral damage during soft-tissue resection. The work involves developing a robotic platform for evaluating aspirator performance and analyzing operating-room data to understand current clinical usage, including surgeon- and tissue-dependent variations.

May 2025 – present

Bass Connections Program (\$23K)

Role: Team Lead; Project Manager; Instructor of Record

PI: Patrick Codd, Duke University

Reimagining Surgery for Rural Needs: Robotics Teleoperation

The project is developing a teleoperated laser surgery platform to expand access to advanced surgical care in rural clinics. The system will enable precise, minimally invasive soft-tissue procedures requiring rapid hemostasis and resection.

May 2024 – April 2025

Bass Connections Program (\$5K)

Role: Team Lead; Led Proposal Writing

Faculty Mentor: Patrick Codd, Duke University

Enhancing Precision Laser Surgery with Flexible Sensors

Project focused on improving the safety and precision of laser-based surgery by developing improved sensory tools for surgeons.

March 2023 – April 2024

India Initiative at Duke (\$2K)

Role: PI; Led Proposal Writing; Built Clinical Collaborations in India

Faculty Mentor: Patrick Codd, Duke University

Portable Tumor Diagnostic Solutions for Resource Constrained Communities

Project evaluated the adaptability and efficacy of a portable tumor diagnostic sensor for use in resource-constrained clinics in Bihar, India. Work included establishing collaborations with S.S. Hospital and IIT Patna and securing the necessary approvals to conduct feasibility studies.

RESEARCH EXPERIENCE

June 2022 – present**Automated Closed-Loop Robotic Laser Ablation of Pathologic Tissues**

Mentor: Patrick Codd, M.D., FAANS (Thesis Advisor, Duke University)

Project includes designing and prototyping a closed-loop laser ablation system for targeted soft-tissue removal, integrating machine-learning-based ablation models, image-guided sensing, and laser-tissue interaction studies with dexterous robotic manipulators.

April 2024 – present**Drone Action Control Using Acoustic Signatures**

Mentor: Boyuan Chen, Ph.D. (Co-advisor, Duke University)

Project aims to enable a drone to track and follow another using only acoustic input from a custom drone-mounted microphone array. The system allows open-loop drone coordination based on passive acoustic signatures in low-visibility, low-resource environments.

September 2020 – December 2021**Speech-based Physiological State Estimation**

Mentor: Xiaoyue Ni, Ph.D. (Master's Advisor, Duke University)

Project investigated the design and fabrication of a multimodal, flexible epidermal sensor patch for transient vital-sign measurements related to neurodegenerative disease assessment.

June 2021 – December 2021**Alzheimer's Disease-Related Dementias (AD/ADRD) Severity Assessment from Unstructured EHR**

Mentor: Hanzhang Xu, Ph.D., R.N., FAAN (School of Nursing, Duke University)

Project investigated pathways to predict AD/ADRD severity at the time of diagnosis in underrepresented communities using Duke's unstructured EHR data.

August 2018 – April 2019

Experimental Study of Ledinegg Instability

Mentor: P. Bangaru Babu, Ph.D. (Undergraduate Advisor, National Institute of Technology, Warangal)

Project involved designing and fabricating a robust, leakproof, low-cost open-loop minichannel test setup to study hydrodynamic instabilities related to Ledinegg behavior in microchannel fluid flow.

May 2018 – July 2018

Prototype Development to Study Ledinegg Instability

Mentor: Debjyoti Banerjee, Ph.D. (Texas A&M University)

Project included an initial literature review and prototype development to experimentally study Ledinegg instability and explore real-time control strategies for high-energy component cooling applications.

May 2017 – July 2017

Microchannel Flow Boiling Heat Sink Development

Mentor: Poh Seng Lee, Ph.D. (National University of Singapore)

Project involved simulated and experimental studies of novel hybrid microchannel heat-sink designs using closed-loop flow-boiling experiments.

May 2016 – June 2016

Sensor Suite for Underwater Robot

Mentor: Atul Thakur, Ph.D. (Indian Institute of Technology, Patna)

Project involved investigating depth-measurement options for an underwater mobile robot.

ENTREPRENEURSHIP AND BUSINESS CAREER

Sustainable Living Lab, Singapore

May 2019 – August 2020

Co-Lead, India

Designed and implemented new technology ventures and delivered Intel's global AI curriculum for non-technical audiences AI for Youth. Formulated and led "Futures+," a foresight-driven community innovation program spanning Bhutan, India, Indonesia, and Singapore.

TEACHING & MENTORSHIP

Coursework and Curriculum Development

Instructor of Record

Fall 2025–Spring 2026

GLHLTH 395T / 396T / 796T

Reimagining Surgery for Rural Needs

Bass Connections – Global Health, Duke University

Designed and led an experiential, research-based course that used structured check-ins and reflective sessions to support interdisciplinary teams developing a teleoperated laser-surgery platform for rural clinics. The course covers optomechanical system assembly, basic optics, and integrated hardware–software development informed by an IRB-approved clinical user study.

Course evaluation rating: 4.25/5 (Fall 2025)

Guest Lecturer

Spring 2025

ME 555

Introduction to Medical Robotics and Surgical Technologies

Department of Mechanical Engineering and Materials Science, Duke University

Delivered a dedicated lecture on **Machine Learning for Medical Robotics**, guiding students from diverse backgrounds through common strategies and pitfalls in domains with strict class imbalance and limited data. Developed scaffolded self-learning plans tailored to different levels of ML experience to support equitable and effective skill development.

Curriculum Developer

Summer 2024

Collaborative Expeditions Grant

Introduction to Medical Robotics and Surgical Technologies

Department of Mechanical Engineering and Materials Science, Duke University

Identified teaching bottlenecks and developed scaffolded self-learning modules on **Design of Experiments, Machine Learning, and Literature Review** as part of a Bass Connections Collaborative Expeditions Grant with Prof. Siobhan Oca. The modules integrated reflections and case studies to promote deeper conceptual understanding and open discussion among students with varied backgrounds.

Guest Lecturer

Spring 2024

ME 555 (special topics)

Introduction to Medical Robotics and Surgical Technologies

Department of Mechanical Engineering and Materials Science, Duke University

Delivered a dedicated lecture on **Design of Experiments**, using active learning and problem-focused examples to help students connect concepts such as confounding variables, sources of bias, parameter selection, and appropriate statistical tests to real experimental workflows.

Teaching Assistant

Spring 2021, Fall 2021, Spring 2022

ME 555 (special topics)

Experiment Design & Research Methods

Department of Mechanical Engineering and Materials Science, Duke University

Worked with first-year master's students and senior undergraduates to scope feasible research projects, conduct regular check-ins, and provide technical support in rapid prototyping and research portfolio development within the capstone design sequence.

Mentorship

Mentored high school, undergraduate, and graduate researchers across robotics, sensing, and medical technologies, with contributions leading to conference posters, journal submissions, and prototype developments.

High School Students

1. **Sarah Dias**, Research Triangle High School — *Multimodal Tissue Boundary Test Bench*
 - IEEE ICRA ELSR Poster 2025 & IEEE-EMBS BSN 2025 Paper, IEEE TMRB Submission (under review)
2. **Prithu Kolar**, NC School of Science and Mathematics — *Acoustic and Video Processing and Real-time Streaming*
 - ICRA ELSR Poster 2025 & IEEE-EMBS BSN 2025 Paper
 - Next:** Park Scholar, NC State University
3. **Felicity Lipchak**, NC School of Science and Mathematics — *Acoustic and Video Processing and Real-time Streaming*
 - **Next:** Dartmouth College

Undergraduate Students

1. **Devi Yuliarti**, Duke University — *Pneumatic Tactile Sensor*
 - Under Review: (First Author) IEEE RoboSoft 2026; IEEE ICRA 2026
2. **Nikhil Aaryath**, Duke University — *Ultrasonic Aspirator (UA)-Based Tissue Estimation and Optimization*
 - Assisting the robotic-arm-based data-collection pipeline for UA with real-time visual and acoustic monitoring.
3. **Zacharias Chen**, Duke University — *Multimodal Tissue Boundary Test Bench*
 - IEEE ICRA ELSR Poster 2025 & IEEE-EMBS BSN 2025 Paper
 - Next:** Medtronic, Hugo Team
4. **Alexa Cahilig**, Duke University — *Multimodal Tissue Boundary Test Bench*
 - IEEE ICRA ELSR Poster 2025 & IEEE-EMBS BSN 2025 Paper
5. **Aakriti**, IIT Bombay — *Characterization of Mechano-Acoustic Speech Information*
 - Contributed to acoustic feature analysis and experimental characterization.
6. **Akshit Srivastava**, IIT Bombay — *Characterization of Mechano-Acoustic Speech Information*
 - Supported data processing and machine learning for mechano-acoustic speech data.

Graduate Students

1. **Yongjun Lu**, Duke University — *Optimizing Ultrasonic Aspirator Parameters for Maximal Tissue Resection*
 - Leading clinical-side data acquisition and processing for ultrasonic aspirator evaluation in the operating room.
2. **Antony Farrand**, Duke University — *Intelligent Acoustic Sensing for Laser-Guided Surgery*
 - Poster presented at the Duke MEMS Master's Research Poster Symposium.
3. **Caroline Chen**, Duke University — *Segmentation & Planning Web Application for Robotic Laser Surgery*
 - IEEE ISMR Poster 2024
Next: Machine Learning Engineer, Google
4. **Changxin Yu**, Duke University — *Unsupervised Learning-Based OCT Segmentation*
 - 3rd Prize, Duke MEMS Master's Research Poster Symposium
Next: Microsoft
